

PRESS RELEASE

Date: October 2009

Client: Thring Townsend Lee & Pembertons

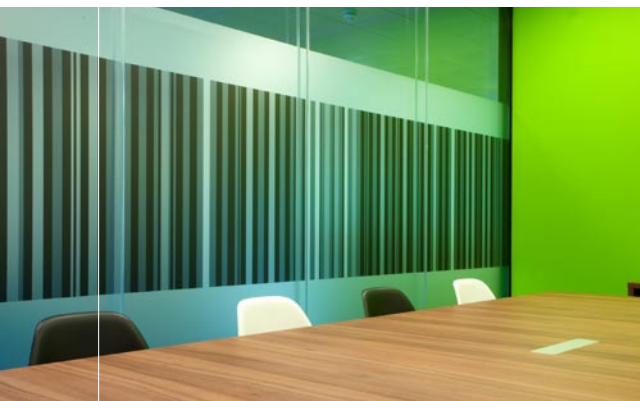

Project: The Paragon, Bristol

3Sphere has successfully completed the fit out of Thring Townsend Lee and Pembertons' (TTL&P) new BREEAM-compliant offices strategically located at the Paragon in central Bristol. The client is one of the South West's leading law firms and their stunning new fourth and fifth floor premises mirrors the dynamic ethos of the company.

Having won a seven-way pitch, 3Sphere utilised their full repertoire of design, fit-out and furniture capabilities to create an inspiring working environment that is both contemporary and professional. The elegant space planning and stylised loose furniture combine to create an understated yet cool atmosphere which complements the very essence of the buildings architecture.

Knoll's Studio Collection predominates with chairs also by Boss and Vitra; Haworth workstations, WJ White tables and Bisley storage solutions suggest a "restrained quality" throughout and soften the divide between client-facing spaces and the staff zones. Vibrant colours and modern stripes merge with sophisticated walnut and shimmering glass extenuating the feel of ambitious modernity, themes in parallel with the client's' brand.

The project was led by Brian Winward, Managing Director of 3Sphere, who enjoyed the scope and scale of the brief: *After a feverish pitching process, we were ecstatic to win this project as it challenged every element of 3Sphere's product offering; the whole build and fit-out process gives a satisfying glow, but it was the design process that was so inspiring. We had a joint creative vision from the outset and our honest relationship with the client enabled the project to flourish.*

Staff moved into their new premises in September 2009 and TTL&P are delighted with their new working environment. Project Manager Alison Holdoway commented: *When selecting a fit out contractor, Thring Townsend Lee & Pembertons required a company with all the key skills of design, furniture supply, construction and post contract support. We also considered whether the relationship would work between the fit out partner and our in house team. Most importantly, we wanted a company who were really committed to our project. 3Sphere satisfied us on all levels which is why they were selected.*

We have worked closely together over ten months on a project that has been complex and required a highly specialist set of skills. We have demanded high performance levels, high quality products and finishes and, particularly in this financial climate, value for money. 3Sphere have responded to our demands and been extremely professional throughout the fit out project. They have been generous with design ideas, time and advice and their professionalism has been matched by that of the subcontractors who have supported the fit out.

3Sphere have successfully completed our project on time and within budget, providing us with a fabulous, contemporary office space that creates a stimulating environment for our employees.

Notes to Editors

- 3Sphere is an independent design, build and furniture company based in Cirencester.
- The company was formed in 2007 following a management buy-out from Spaceworks.
- 3Sphere are an authorised dealer for Vitra, Haworth and K&N City furniture.
- The company have a prestigious corporate client base that includes Tribal Group, BDO Stoy Hayward, Invensys, Westinghouse Rail, Alcatel-Lucent and HSBC among others.
- In 2009, the company completed the loose furniture contract for The Guardian's new offices in Kings Cross, London.
- 3Sphere have also recently launched Kontract Interiors to provide build-related services.
